

Representation

# Stemmann-Technik Nederland BV, your total care partner for the BeNeLux

We have been operating from our Netherlands office since 1992 providing our clients with an efficient and friendly service. This success now enters into the next stage:

**As of July the 1<sup>st</sup>, 2009, Stemmann-Technik Nederland BV is your representative for Belgium, Luxemburg and The Netherlands.**

Our products best fit the description of Energy and Data transfer for mobile equipment, both for the industry as well as public transport.

We are proud to be the sole representation in Belgium for **Pintsch Bubenzer** (then still called Bubenzer Bremsen) since 2004. Also for Stemmann products we have done a few projects in Belgium, so it is not an unfamiliar area/market for us.

With an enthusiastic team of people we are able to offer you the following:

- technical-commercial advisors who can guide the whole process from quotation to after sales;
- a customer service to discuss your spare parts requirements;
- project management;
- our own service department / work shop;
- service engineers on location, who independently or in collaboration can take care of maintenance, installation, etc.

To find out more about our company, we invite you to visit our website [www.stemmann.be](http://www.stemmann.be). Please also find enclosed our delivery program.

On behalf of our team, we would welcome your enquiry and look forward starting this next stage together.

With kind regards,

  
Jan-Willem Schoneveld  
General Manager  
Stemmann-Technik Nederland BV

  
Michael Grunwald  
Managing Director  
Stemmann-Technik GmbH
